

ATTACHMENT B

REMARKS

In response to the Advisory Action, the Examiner suggested that the substitution of the language "transferring the concentrated solution from the falling film evaporator through a [second] distributor into a cooler where it is cooled" instead of the previously proposed wherein clause, along with the indication that the distributor in step (c) was a first distributor, would obviate the outstanding Section 112 rejections. In addition, the Examiner required the cancellation of withdrawn Claim 11. Applicants have thus made the suggested changes in the present amendment, including the indication of a first and second distributor as requested by the Examiner, and upon entrance of the amendment, the present case will be placed in condition for allowance.

Entrance of the amendment and allowance of the application are thus earnestly solicited. Should any additional minor changes be necessary, the Examiner is requested to telephone the Applicants' counsel in order to expedite the allowance in this case.

END REMARKS
